

LUCE APP

SMARTPHONE APPLICATION

Luce App, designed by BH Technologies, simplifies the lives of local authorities and installers. This mobile application makes equipment configuration and maintenance faster, more intuitive and more secure. It allows you to program Radiolite 220 and 4XX while controlling the deployment of BH Nodes. With a clear interface and direct connection to devices, Luce App streamlines configuration, commissioning and maintenance in the field. A true ally for optimised and connected public lighting management. The application is available free of charge on the Apple Store and Google Play.

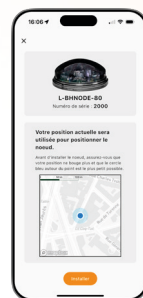

FEATURES

RADIOLITE SETTINGS

- ♦ The application enables local management via Bluetooth of Radiolite devices (220 and 4xx range, equipped with a Glob antenna) installed in public lighting cabinets
- ♦ Configuration of weekly and exceptional programming
- ♦ Sending of forced switches in real time
- ♦ Visualisation of upcoming switches
- ♦ Display of the last 80 switches and the last 80 power-ups
- ♦ GPS or Lora radio analysis
- ♦ Direct access to the Support team and product documentation
- ♦ Synchronisation with the Luce platform

BH NODES SETTINGS

- ♦ Register and position BH Nodes when deploying a network of light points
- ♦ Compatible with BH Nodes 40 mm, 80 mm and cellular BH Nodes
- ♦ Browse the inventory of nodes installed in an area via an interactive map or a list to view locations
- ♦ Register a node by scanning its QR code (quick, field-friendly) and direct geolocation of the equipment
- ♦ Upload BH Nodes to the Luce platform
