

LUCE

THE SMART PUBLIC LIGHTING MANAGEMENT PLATFORM

Luce is the business platform that enables you to monitor, control and optimise your entire public lighting network, whether it consists of lighting points, lighting cabinets, or both.

From a single interface, view the status of your equipment in real time, create programmes, send remote commands, manage alerts and immediately detect anomalies to improve the performance of your network.

BENEFITS

MONITOR YOUR NETWORK

- ♦ Interactive mapping and complete inventory: manage your equipment at a glance
- ♦ Real-time equipment status: see which equipment is on, off or faulty
- ♦ Automatic alerts: be notified as soon as an incident occurs
- ♦ Monitor changes in electricity consumption and detect deviations
- ♦ Dashboards: access a consolidated view of syndicated lighting networks

CONTROL YOUR EQUIPMENT

- ♦ Simplified programming: create scenarios and assign them to weekly, monthly, annual or exceptional schedules
- ♦ Individual or group control: control equipment individually or entire areas in a single action
- ♦ Forced commands: adapt lighting to specific, one-off requirements
- ♦ With Luce App, your field technicians have the essential Luce features at their fingertips

TAKE CONTROL OF YOUR ECOSYSTEM

- ♦ Real-time encrypted data, compliant with the TALQ2 protocol
- ♦ Interoperability through our APIs: connect with all CMMS, GIS and hypervisor systems
- ♦ Compatible with 5G, Zhaga, DALI, D4i and more

SIMPLIFY YOUR OPERATIONS

- ♦ Manage your teams and their access rights
- ♦ Access your action history
- ♦ Benefit from technical support based in France
- ♦ Reduce your dependence on manufacturers

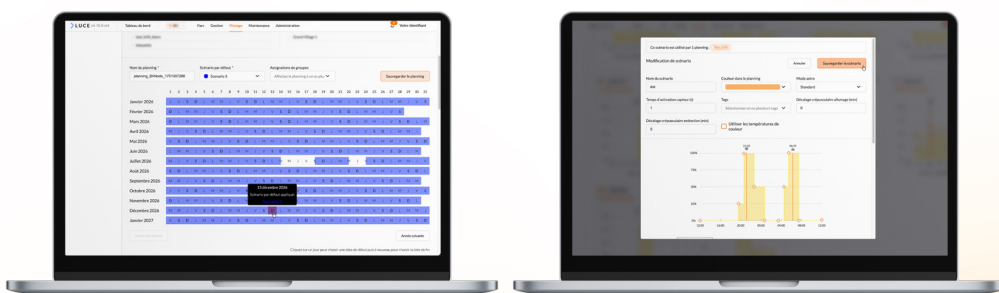

FEATURES

	LIGHTING POINTS	ELECTRICAL CABINETS
Consolidated view of syndicated networks	✓	✓
Dynamic network and inventory view	✓	✓
Status monitoring	✓ (Lighting, Communications, Network)	✓ (Communications, Energy consumption)
Detailed equipment information (product ID, assigned group, geolocation, energy consumption, commands, events)	✓	✓
Scheduling / Programming	✓	✓
Forced command	✓ Lighting level setting (%) + duration in minutes	✓ On / Off / Do nothing by relay + duration in minutes
Emergency lighting command	✓	✓ Switch all cabinet relays to ON for a defined duration in minutes
Alert and alert threshold configuration	✓	✓
Group management (Inventory, commands, events)	✓	✓
User roles and permissions management	✓	✓
Remote management via Luce App	✓	✓
Compatible products	BH Node 40, BH Node 80, BH Node Gateway, Retronode	BH Gate, Radiolite 4XX with Glob antenna

PROGRAMMES AND SCENARIOS

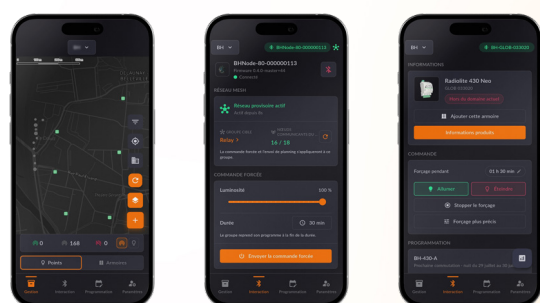

Easily programme your network: create and send weekly or exceptional programmes to one or several pieces of equipment, choose from different predefined Astro modes, and customise scenes within each scenario by adjusting lighting levels and fading for lighting points.

All programmes are logged for simplified monitoring and traceability.

LUCE APP

The mobile application that supports your field operations.

Configure, commission, manage programmes and maintain your lighting points and public lighting cabinets directly from a smartphone. Information is synchronised with Luce to ensure real-time monitoring of your network.
